Cylinda-Line

UNTOUCHED BY TIME

The story of great design...

A rough sketch of a pitcher. Drawn on a napkin with a simple pen. During an ordinary family dinner, the world famous designer Arne Jacobsen sketched Cylinda-Line. This was the birth of a famous design series that has survived for decades - UNTOUCHED BY TIME.

The harmonious forms of Cylinda-Line and its clean modernistic lines resulted in a fast track to fame. In 1967, Cylinda-Line received its stamp of approval when the line was included in Phaidons 999 Design Classics. The series was acknowledged for its simplicity, balance and pure form.

Manufacturing seamless, cylindrical forms in stainless steel was a challenge. However, Stelton developed a state of the art technique for production. Hard wearing and durable for everyday use is the result of this technique. We invite you to enjoy it and use it day after day, year in and year out.
